L^AT_EX Poster

Poster Tutorial #2

Now, we put in some fancy settings to the poster coverage.
Also, some more packages are loaded for the future poster content.

```
\documentclass[12pt]{article}
\usepackage[aspaper,landscape]{geometry}
\usepackage{lipsum}
\usepackage{modern}
\usepackage{enumerate}
\usepackage[poster]{tcolorbox}
\tcbuselibrary{minted} % <- replace by \tcbuselibrary{listings}, if minted does not work for you
\pagestyle{empty}

\begin{document}
\begin{tcbposter}[
  coverage = {
    spread,
    interior style=(top color=yellow,bottom color=yellow!50!red),
    watermark text=(\LaTeX\ Poster),
    watermark color=yellow,
  },
  poster   = {showframe,column=4,row=5},
]
% Here, we insert the poster content later
\end{tcbposter}
\end{document}
```

Poster Tutorial #3

It is time to fill boxes into the poster environment. This is the most crucial part of your poster creation, because you have to decide about the general contents and the base design. But, as you can see in the listing below, the boxes are placed with relative positions to each other and the sizes are able to change automatically.

```

\begin{document}
\setlength{\textwidth}{15cm}
\setlength{\textheight}{20cm}

% Title
\posterbox[name=title,column=1,span=3,below=top]{
  \resizebox{18cm}{!}{\Vofseries\huge My Important Project}\{\smm}
  Hans.Mustermann@deepthought.university
}

% References
\posterbox[adjusted title=References]{name=references,column=2,span=1.5,between=title and
algorithm}

% Process
\posterbox[adjusted title=Picture=sa]{name=process,column=2,span=2,above=references}{}

% Project Description
\posterbox[adjusted title=Project Description]{name=project,
sequence=1 between title and bottom then 2 between title and process}{}

% Central Picture
\posterbox[adjusted title=Central Picture]
{name=picture,column=3,between=title and process}{}

% Core Algorithm
\posterbox[adjusted title=Core Algorithm]
{name=algorithm,column=4,between=top and references}{}

% Contact
\posterbox[adjusted title=Contact]
{name=contact,column=4,span=1.5,between=process and bottom}{}

\end{document}

```

The project box is made breakable. Note the two parts project1 and project2 where the second part is denoted by a placeholder.

Poster Tutorial #4

As next step, we choose some nice settings for all the boxes. These global settings are applied using the `boxes` option of the poster.

Also, we do not need the auxiliary frame lines anymore and we set `showframe=false`.

```

\begin{tcbposter}[
  coverage = {
    spread,
    interior style={top color=yellow,bottom color=yellow!50!red},
    watermark text={\LaTeX\ Poster},
    watermark color=yellow,
  },
  poster = {
    showframe=false,columns=4,rows=5,
    boxes = {
      enhanced standard jigsaw,sharp corners=downhill,arc=3mm,boxrule=1mm,
      colback=white,opacityback=0.75,colframe=blue,
      title style={left color=black,right color=cyan},
      fonttitle=\bfseries\Large\scshape
    }
  }
]
\end{tcbposter}

```

We go on with the `process` which gets some example `tikzpicture`.
 Note that you always can insert additional `colorbox` options like `align=center` to a posterbox.

```

%...
\posterbox[adjusted title=Process,align=center]{name=process,column=2,span=2,above=references}{
\begin{tikzpicture}[very thick, radius=2cm]
\begin{scope}
\path[draw=black,fill=white] (0,0) circle;
\path[fill=red] (0,0) -- (2,0) arc [start angle=0, end angle=30];
\end{scope}
\begin{scope}[xshift=5cm]
\path[draw=black,fill=white] (0,0) circle;
\path[fill=red] (0,0) -- (2,0) arc [start angle=0, end angle=70];
\end{scope}
\begin{scope}[xshift=10cm]
\path[draw=black,fill=white] (0,0) circle;
\path[fill=red] (0,0) -- (2,0) arc [start angle=0, end angle=110];
\end{scope}
\begin{scope}[xshift=15cm]
\path[draw=black,fill=white] (0,0) circle;
\path[fill=red] (0,0) -- (2,0) arc [start angle=0, end angle=240];
\end{scope}
\end{tikzpicture}
}
%...
